PROFESSIONAL SUMMARY

Full-stack developer who ships end to end: REST APIs, authentication and data models in Node.js/TypeScript and Django, and fast, accessible interfaces in Next.js and React. Internship experience on production platforms, a published Chrome extension, and a habit of writing clean, documented, tested code. Strong foundation in software engineering principles, problem-solving and modern development workflows.

PROFESSIONAL EXPERIENCE

Backend Developer Intern

Jul 2025 – Sep 2025 | Addis Ababa, Ethiopia

Kuraz Technologies 🔗

- Developed and maintained backend systems using Express.js and Node.js with a focus on scalability and performance.
- Built and integrated RESTful APIs, JWT authentication, and role-based access control systems.
- Improved database efficiency and scalability through optimized queries and backend performance enhancements.
- Maintained clean and modular backend architecture while collaborating within an agile development team.

Tech Stack: Express.js, Node.js, MongoDB, REST APIs, JWT Authentication

Software Engineering Intern

Oct 2025 – Nov 2025 | Addis Ababa, Ethiopia

Stenar Trading 🔗

- Collaborated with a development team to build a platform focused on youth career development and mentorship.
- Designed and implemented responsive and accessible user interfaces across multiple devices.
- Improved website performance and user experience through frontend optimization.
- Contributed to a scalable platform designed to reach millions of users.
- Worked with modern frontend technologies and agile development practices.

Tech Stack: Next.js, JavaScript, Tailwind CSS

SELECTED PROJECTS

BoardWave

Real-time collaborative whiteboard with peer-to-peer video

- Built a shared drawing canvas (pen, shapes, text, sticky notes, images) with live named cursors, synced to every participant over WebSockets.
- Implemented peer-to-peer video and audio with a WebRTC mesh, STUN/TURN configuration and graceful fallback when no device is available.
- Designed rooms with short join codes, host/participant roles, lockable rooms and peer limits; dashboard with live-presence badges and board thumbnails.
- Built the Express 5 + Prisma/PostgreSQL backend: JWT auth for REST and the WebSocket handshake, email verification, password reset, debounced board persistence and reconnect with exponential backoff.

Tech Stack: React 19, TypeScript, Vite, Tailwind CSS, Express 5, WebSockets, WebRTC, Prisma, PostgreSQL

YeMuyaWeg Initiative Platform

Website: yemuyaweginitiative.com

- Worked as part of a collaborative team to build a platform empowering Ethiopian youth through mentorship and career development.
- Designed and implemented responsive user interfaces for accessibility across devices.
- Optimized platform performance and enhanced user experience.
- Contributed to a mission-driven platform targeting impact for over 15 million people by 2034.

Tech Stack: Next.js, JavaScript, Tailwind CSS

ScrollShot

Chrome extension published on the Chrome Web Store

- Phone-style incremental scroll capture: visible area, full page, dragged region or clicked element; works inside nested scroll areas, chat apps, docs sites and PDFs.

- Full annotation workspace (arrows, boxes, highlights, numbered steps, text, blur/black-out) and beautify options (padding, shadow, gradients, device frames).
- Export to PNG, JPEG with target file size, or PDF (long page or A4/Letter), including searchable PDFs via on-device OCR in 13 languages.
- Privacy-first: all processing on-device, no account, no upload, no watermark.

Tech Stack: TypeScript, Chrome Extensions API, Canvas, OCR, PDF generation

Bank System API

Production-grade banking REST API

- Implemented registration with email OTP, Google OAuth sign-in, JWT access/refresh token rotation and logout-everywhere with revocation tracked in Redis.
- Built bank accounts, credit cards, deposits/withdrawals, atomic transfers to beneficiaries, paginated statements and transaction summaries.
- Added role-based admin endpoints to list, block and unblock users, accounts and cards, plus dashboard statistics.
- Hardened with Zod validation, bcrypt, helmet, rate limiting, CORS allow-lists and NoSQL-injection sanitisation; documented with Swagger/OpenAPI and a Postman collection.

Tech Stack: Node.js, TypeScript, Express 5, MongoDB, Mongoose, Redis, JWT, Google OAuth, Zod, Swagger

DevFlow - Better Stack Overflow

AI-Powered Developer Knowledge Sharing Platform

- Built a developer collaboration platform with AI-assisted responses and modern authentication.
- Implemented question-and-answer functionality, profile management, and responsive user interfaces.
- Integrated AI-powered features using Gemini API.
- Developed scalable frontend and backend architecture with modern UI components.

Tech Stack: Next.js, MongoDB, Tailwind CSS, Shadcn/UI, Zod, Auth.js, Gemini API

Buna House

Coffee-shop e-commerce storefront and admin dashboard

- Built the public storefront (categorised menu, cart, checkout, order confirmation) and an admin dashboard (orders, products, customers, leads, analytics) in a single Next.js App Router project.
- Modelled the Postgres schema on Supabase with Row Level Security and storage buckets; server-side auth with bcrypt, rate limiting and a read-only demo account enforced server-side.

Tech Stack: Next.js 16, React 19, TypeScript, Supabase, PostgreSQL

Habesha Home

Mobile Home Rental Application

- Developed a modern mobile home rental application tailored for the Ethiopian market using Flutter and Firebase.
- Built features for property listing, home searching, and rental management for both renters and property owners.
- Implemented secure user authentication and real-time data synchronization using Firebase services.
- Designed responsive and intuitive mobile UI/UX focused on accessibility and seamless user experience.
- Developed scalable backend functionality with cloud-based infrastructure and real-time database integration.

Tech Stack: Flutter, Firebase, Dart

EDUCATION & TRAINING

Addis Ababa Science and Technology University

B.Sc. in Software Engineering

Built strong foundations in Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Operating Systems, Networking, System Analysis & Modeling, Computer Architecture, and Machine Learning.

ALX Africa

May 2025 – Sep 2025 | Online Training

ALX Back-End Web Development Program

- Completed an intensive backend development training program focused on Django and scalable web application development.
- Gained hands-on experience building, testing, and deploying backend systems using modern development practices.
- Earned a professional completion certificate.

Google Developer Groups (GDG) Frontend Development Training

- Completed frontend development training focused on React and modern web development best practices.
- Built interactive and responsive web applications while improving frontend architecture and UI development skills.
- Earned a certificate of completion.

SKILLS

Programming Languages — JavaScript, TypeScript, Python, SQL, Java, C++, PHP

Frameworks & Technologies — React.js, Next.js, Django, Express.js, Node.js, MongoDB, Tailwind CSS

Tools & Platforms — Git, GitHub, Docker, Figma, REST APIs

AWARDS & ACHIEVEMENTS

Presidential Award 

From Addis Ababa Science and Technology University

- Awarded the Presidential Award for achieving an outstanding semester GPA of **3.88/4.00**, recognizing strong academic excellence and performance.

CERTIFICATES

ALX Back-End Web Development (Django) 

- Successfully completed a 4-month intensive backend development program focused on building, testing, and deploying scalable web applications using Django.

Certificate of Appreciation — YeMuya Weg Initiative 

- Recognized for dedication, professionalism, and valuable contributions during internship participation and platform development work.
